

Lead Handset SDET

Cequint has a strong team of talented individuals full of enthusiasm and energy put into a group effort. The innovation and creative ideas from the Cequint team will break through the boundary of mobile technology and create new market opportunities. We are very committed to our customers but we believe that our employees are our number one asset.

At Cequint you'll have the opportunity to work directly with all levels of management and really have your voice heard. We're here to make an impact – and we are looking for people who share in that outlook – in all areas of life.

Culture - At Cequint, you'll work in a fast-paced environment surrounded by a diverse group of innovative individuals, where your ideas will quickly become a reality. We work hard – but also slow down to relax and have fun, celebrating our achievements to ensure that everyone remains enthusiastic and happy. Team lunches, barbeques, happy hours, and other entertaining events are frequent happenings at Cequint

Benefits - Our philosophy is to hire quality individuals who are happy, balanced and genuinely enjoy what they do, and in turn, everyone will benefit. In order to ensure this philosophy, we put our most valuable asset first – our employees. Cequint is proud to offer competitive salaries, a generous 401k retirement plan, full medical and dental coverage, paid vacation and holidays, a monthly parking/transportation stipend, and other company perks such as free beverages and snacks. Are you:

- Willing to wear many different hats within a company and put your all into getting the job done?
- Superior with multi-tasking and prioritization?
- Efficient and self-motivated?
- Highly energetic and forward thinking?
- Detail-oriented, yet able to see the bigger picture?
- Excellent at communicating your ideas to others?
- Up for an exciting challenge?

If you answered yes to the above questions, then this is the place for you.

As a Lead Handset Software Tester you will be responsible for all elements of quality assurance in the development and deployment of Cequint products. This will include testing handset functionality as well as handset interfaces with Cequint servers and carrier systems. Your job responsibilities will include: test plan development, test case development, white box testing, black box testing, manual handset tests. You will work closely with the handset integration engineering team as well as handset manufacturers to identify and document defects.

Qualifications and Experience:

- Bachelor's degree in a technical field or equivalent education/experience
- 5+ years of software testing experience
- Development of test plans and test cases
- Experience testing wireless or embedded applications
- Testing Tools: bug tracking, test case repository, etc.
- Experience creating Automated Tests
- SQL knowledge is a plus
- Lead experience
- Knowledge of handset operating systems a plus (BREW, J2ME, Android, Blackberry, etc)
- Wireless Networks and Systems
- Software development lifecycle and commercial product deployment
- Solid communication skills in the English language

Cequint provides competitive salaries, DOE, full benefits spread, 401k, discount health-club membership, and a host of other benefits.
